

JG Howard Ltd are happy to undertake all your building requirements as part of your kitchen project and we can:

- remove walls
- build new walls
- brick up unused doorways or windows.
- install new windows

We also offer a plastering service to:

- tidy up walls when walls have been removed
- plastering of new walls
- plastering of blocked up doorways and windows
- tidy walls where tiles have been removed

**Some walls are load bearing... so JG Howard Ltd will complete a survey and may involve a structural engineer to provide advice on how best to implement your structural ideas (for example if we are to remove a load bearing wall, do we need a beam and if so what size and where exactly should it go).**
